**THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.**

**THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.**

### HOW TO REPLY TO THIS NOTICE:

#### I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.**

# **PART B - FEE(S) TRANSMITTAL**

**Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, Virginia 22313-1450  
or Fax (571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 892 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 892 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for an examiner's amendment was given in a telephone interview with Edward Van Gieson on 8/20/08.

However, the Examiner has made several minor changes to the draft claims submitted by Edward Van Gieson (by way of facsimile on 8/21/08). Such as to amend numerous instances of the word "the" to "said" in the claims in order to remain consistent with terminology throughout the claims (as "the" is used generically several times and it would create confusion to use "the" both in the generic sense and as an alternative to "said").

Additionally, claim 10 has been amended to read as a firewall "stored on a machine readable medium" as opposed to Edward Van Gieson's suggestion to remove "resident on a host computer" without replacing it with a similar phrase. Removing the phrase with no further modification would create a 35 U.S.C. 101 rejection as the firewall alone may be implemented in at least one embodiment as software (see [0029] of Applicant's specification which discusses the firewall being embodied as a computer program product/software or in the TCP/IP stack). The state machine **430** is not described in sufficient detail in the

Applicant's specification to lead to the conclusion that it may only be implemented in hardware, therefore the preamble of the claim needs to indicate that the system is not directed to non-statutory subject matter.

The Examiner believes the amendments to the claims made by Examiner to be minor changes that do not change the thrust of the claims, but do avoid confusion and 35 U.S.C. 101 issues as discussed above.

The application has been amended as follows:

**What is claimed is:**

1. A method of using a firewall resident on a host computer to prevent spoofing of an address resolution cache of said host computer, the method comprising:

said firewall receiving a first unsolicited message from a target computer station that submits a genuine address resolution for a network protocol address;

said firewall checking independently cached address resolution information associated with said host computer;

in response to determining that cached address resolution information for said network protocol address of said target computer station has a previously cached address resolution which differs from said genuine address resolution submitted by said first

unsolicited message, said firewall issuing a first broadcast request for network elements having said network protocol address to reply with address resolution information in order to check the authenticity of said first unsolicited message submitting said genuine address resolution for said network protocol address;

in response to determining that no reply messages match said previously cached address resolution that would contradict said genuine address resolution in said first unsolicited message, said firewall determining that said first unsolicited message is not spoofed and permitting at least one message to pass onto said host computer which includes said genuine address resolution for said target computer station;

said firewall receiving a second unsolicited message from a spoofer that submits a spoofed address resolution for said network protocol address of said target computer station;

said firewall checking said independently cached address resolution information associated with said host computer;

in response to determining that said previously cached address resolution information for said network protocol address differs from said spoofed address resolution submitted by said second unsolicited message, said firewall issuing a second broadcast request for network elements having said network protocol address to reply with address resolution information in order to check the authenticity of said second unsolicited message submitting said spoofed address resolution for said network protocol address of said target computer station;

in response to receiving a reply message from said target computer station that matches said previously cached address resolution, said firewall determining that said second unsolicited message is a spoofed message and blocking at least one message which includes said spoofed address resolution from passing onto said host computer;

wherein said firewall is operable to protect said host computer from spoofed address resolution messages while permitting genuine address resolutions.

2. The method of claim 1, wherein said network elements reside in a LAN network running Internet Protocol Version 4 (IPv4) using the Address Resolution Protocol (ARP) for resolving medium access control (MAC) addresses, and said address resolution cache is an ARP cache mapping IPv4 addresses to MAC addresses.

3. The method of claim 1, wherein said network elements reside in a network that implements Internet Protocol Version 6 (IPv6) with Neighbor Discovery for resolving MAC addresses, and said address resolution cache is a Neighbor Discovery cache for mapping IPv6 addresses to MAC addresses.

4. The method of claim 1, wherein said firewall maintains a shadow copy of said address resolution cache, wherein said shadow copy is used as the source of said cached address resolution information.

5-8. (Cancelled)

10. A firewall stored on a machine readable medium for preventing spoofing of an address resolution cache of a host computer, said firewall comprising:

a state machine in said firewall configured to check independently cached address resolution information in response to receiving a first unsolicited address resolution response message from a target computer station directed to said host computer including a submitted genuine address resolution for a network protocol address;

said state machine generating a request for network elements to report an address resolution for said network protocol address in response to determining that said genuine address resolution of said first unsolicited message differs from a previously cached address resolution for said network protocol address in order to check the authenticity of said first unsolicited address resolution message submitting said submitted genuine address resolution for said network protocol address;

said state machine permitting an update of said independently cached address resolution information to include said submitted genuine address resolution in response to determining that no address resolution reply messages have said previously cached address resolution for said network protocol address that would contradict said submitted genuine address resolution of said first unsolicited message;

said state machine configured to check said independently cached address resolution information in response to receiving a second unsolicited address resolution response message from a spoofer including a submitted spoofed address resolution for said network protocol address of said target computer station;

said state machine generating a request for network elements to report an address resolution for said network protocol address in response to determining that said submitted spoofed address resolution of said second unsolicited message differs from a previously cached address resolution for said network protocol address in order to check the authenticity of said second unsolicited address resolution message submitting said submitted spoofed address resolution for said network protocol address; and

said state machine blocking an update of said independently cached address resolution information of said address resolution cache of said host computer to include said submitted spoofed address resolution for said network protocol address in response to

determining a reply message has said previously cached address resolution in contradiction to said submitted spoofed address resolution of said second unsolicited message;

wherein said state machine in said firewall protects said host computer from spoofed address resolution messages while permitting genuine address resolutions.

20. (Cancelled)

22. (Cancelled)

The following is an examiner's statement of reasons for allowance: the prior art does not teach (or even suggest) allowing unsolicited address resolution information to be accepted by a networking system. The prior art is directed to analyzing the number of outstanding ARP requests in the network and judging whether or not a response is valid based on whether or not a request is outstanding for such information. Applicant's invention instead accepts unsolicited ARP responses if they are shown to contain genuine (as opposed to spoofed) address resolution information.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian P. Whipple whose telephone number is (571)270-1244. The examiner can normally be reached on Mon-Fri (9:30 AM to 6:00 PM EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bunjob Jaroenchonwanit can be reached on (571) 272-3913. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
